Job title:

EDUCATION

Jawaharlal Nehru Technological University
Bachelor of Technology in Electronics and Communication

2017 - 2021

PROFILE

WORK EXPERIENCE

NCR Voyix

Software Engineer II

Project: Emerald (Cloud-Enabled Retail POS Platform)

Tech Stack: C#, .Net Core, Web API, EF Core, SQL Server, React, HTML, CSS

03/2025 - Present

- Designed and developed scalable RESTful APIs using .NET Core, Web API, and SQL Server, supporting high-volume retail transactions.
- Implemented business logic and data access layers following SOLID principles, improving maintainability and extensibility.
- Built responsive and reusable UI components using React, Redux, and TypeScript, enhancing user experience and application stability.
- Improved application performance through code refactoring and query optimization, reducing response times by approximately 20%.
- Owned feature delivery end-to-end from requirement analysis to production release.
- Contributed to system design discussions, API versioning strategies, and scalability improvements for cloud-enabled retail applications.

Accenture

Software Engineer

Project: NetLink

Tech Stack: C#, .Net Core, Web API, EF Core, SQL Server

10/2021 - 03/2025

- Analysed business requirements and translated them into technical designs and scalable application modules.
- Developed and enhanced backend services using ASP.NET MVC, Web API, Entity Framework, and SQL Server.
- Refactored legacy components to improve code readability, performance, and long-term maintainability.
- Authored technical design documents and ensured alignment with architectural standards.
- Participated in sprint planning, estimation, and retrospectives, contributing to predictable and high-quality deliveries.
- Improved system reliability by implementing robust validation, error handling, and unit tests.
- Developed backend business logic and RESTful APIs to support core platform functionality.
- Implemented database operations using SQL Server and Entity Framework, ensuring data integrity and performance.
- Actively contributed to Agile ceremonies, including sprint planning and daily stand-ups.
- Wrote unit and integration tests to maintain code quality and minimize production issues.
- Collaborated closely with frontend developers and QA teams to deliver stable releases.

Unschool

Intern

- With good python scripting knowledge, Machine learning and able to handle advanced mathematics got selected as intern in Unschool.
- Worked on the various projects like Mall Customer Segmentation, Loan Prediction using Machine Learning.
- Able to understand and analyse the datasets very quickly that helps me to understand the requirements of the client very fast.
- Designing the key feature from dataset and presenting them in a different way using scripting.

TECHNICAL SKILLS

Backend Technologies:	C#, .NET Core, ASP.NET MVC, ASP.NET Web API, Entity Framework, EF Core, SQL Server
Frontend Technologies:	React.js, TypeScript, Redux, HTML5, CSS, AI, ML
CI/CD:	GitHub Actions, Release Pipelines, JFrog Artifactory, Automated Builds, Docker (Basic Exposure)
Testing & Quality:	xUnit, nUnit, Cypress, Jest, Integration, Testing
Tools:	Git, TFS, Postman, Swagger, Visual Studio, VS Code
Practices & Concepts:	Agile (Scrum), SOLID Principles, Design Patterns, RESTful architecture, MachineLearning

KEY ACHIEVEMENTS

- Able to adapt to new technologies like Machine Learning, Artificial Intelligence quickly.
- Increased code coverage by 30% using unit and integration tests.
- Participated in 100+ sprint sessions with 95% task completion.
